PROFESSIONAL PROFILE

Project Manager

There's the PM who manages the project. And the PM who understands the project. I'm the second one. Thirty years inside Oracle, PL/SQL, Data Warehouse, performance tuning — for ten of them I've also been doing Project Management.

What I recognize right away on a project: when a requirement is not implementable as written. When an estimate is optimistic out of pressure, not data. When the real risk is not the deadline, it's the architecture.

10+ projects delivered between 2013 and 2020, teams of 3-7 people, budgets €100K-€500K, multi-country and full-remote. Sectors: Banking, Telco, Insurance, Public Administration. Clients: Atradius, Generali, TIM/Huawei, Telepass, Banca d'Italia, Cassa Depositi e Prestiti. Scrum and Agile, certified training. What I bring: technical translation of requirements, early discovery of risks, one common language for both the team and the stakeholders.

KEY SKILLS

- **Project Management & Methodologies:** Project planning and milestones · Risk and issue management (proactive identification, mitigation planning) · Agile and Scrum (Sprint Planning, Daily Stand-up, Retrospective, Backlog Refinement) — certified training · Requirements definition, scope management, stakeholder engagement · Release planning and delivery coordination.
 - **Tools:** Microsoft Project · Jira · Microsoft Excel and Google Sheets (reporting, dashboards, data analysis — daily use) · Git and GitHub (issue tracking, CI/CD, collaborative workflows).
 - **Technical Skills Supporting PM:** Data Warehouse Architecture (Kimball, Inmon, GCP) · Oracle Database (DBA, Performance Tuning, PL/SQL) · Advanced SQL · ETL/ELT · Business Intelligence · technical feasibility assessment and development effort estimation.
 - **Leadership & Communication:** Coordination of distributed technical teams (3-7 people, multi-country) · Effective communication with teams, business stakeholders and management · Mentoring and team skill development · Meeting facilitation and conflict management.
